

THE CARTERCAR

We are pleased to announce to our patrons and friends that our first shipment of the famous CARTERCAR of the 1910 Model arrived in the steamship Alameda and are now on display at our Garage, Hotel street near Richards, where we would be happy to give free demonstration to interested Persons at any time. Some of the Cars arriving in this lot have already been sold, but we are booking orders for machines to be delivered in the near future. At least one of the present lot will be offered for sale on the well established plan of "first come, first served."

We are selling these Cars, fully equipped, with magneto windshield, gas and oil lamps, speedometer, etc., etc., for \$1400, \$1600 and \$1950. This means a firstclass machine, ready for the road, at the price of a much lower classed car.

THE CARTERCAR

On the Mainland the Cartercar ranks second to none. Its name stands for Durability, Reliability and a satisfied owner everywhere. Look at a Cartercar driver and you see a man who is proud of his machine. He knows why.

The CARTERCAR IS FRICTION DRIVEN and consequently has no gear derangements so familiar to and so much dreaded by drivers of others machines; a one-speed shift that gives the chauffeur immediate and complete control of his machine. It can be made to travel at a high, intermediate or low speed with little effort and quickly, and is particularly easy to handle in turning sharp corners or rounding curves on Mountainous roads. This car is barred in all competitive trials in hill-climbing contests, everywhere,—a qualification in an uneven country like this of the greatest importance. In pulling through heavy sand or mud it has no equal. Let us give you a free demonstration.

We wish to call especial attention to our repair department for machines of all makes. It is directed by experts brought by us from the coast. They are familiar with the construction of all machines and we guarantee their work to be of the first class. Consult us at any time.

AT THE THEATERS

AT THE THEATERS.
Saturday night's weather was anything but agreeable in the playhouse section of the city. The rain came down in showers at frequent intervals, and the air was damp and cold. Nevertheless, the theaters were well patronized, and, once inside, the audiences forgot the storm outside and had one jolly, good time. The big Orpheum was packed and the program was one of the best yet put on by the popular Golden company. The Empire and Art were both filled all the evening, and the open-air Park kept going despite the rain, the crowd taking refuge under the large central shed and staying with the excellent program until it was finished.

THE WRIGHT AEROPLANE.
Tonight at the Park theater the big moving picture feature will be the Wright aeroplane. Heretofore French airships have been shown at local theaters, but this is the first time an American aeroplane in America will have been displayed here. In the pictures will be seen President Taft, Speaker Cannon and the Wrights examining the machine before it starts into the air. It is a great picture—its equal never having been presented here before. Walter Stanton and Miss Orville will present new songs and imitations and the little Melnotte sisters will again appear.

CARUSO AND SCOTTE.

"The Heart" will be the big feature film at the Art theater tonight and tomorrow night. In addition there will be comical sketches and musical specialties. A duet by Caruso and Scottie will be one of the features.

AT THE EMPIRE.

"The Price of a Soul" will be a big feature film at the Empire theater this evening, and a silent presentation of Victor Hugo's "Les Misérables," another. A third will be "The Cobbler and the Millionaire," a fable by La Fontaine of a rich man who presents a cobbler with a bag of gold on condition that he never work again. He gleefully accepts the offer but afterward suffers such agony in taking care of his fortune that he returns the money and goes back to honest toil.

"The Hungry Actor," showing the clever ruse he worked to get a meal, is a rich, comical film, while "How Brown Got Married" is a side-splitter, closing a remarkably strong program.

EXHIBIT OF THE PACKARD TRACK

The exhibit of the Packard Motor Car Company, in the commercial vehicle section of the Tenth National Automobile Show, Madison Square Garden, New York, January 8 to 15, consists of one of the several trucks recently built for John Wanamaker. This is a good example of the progress that has been made to meet business requirements in body designing as well as in the mechanical construction of trucks. The Packard three-ton truck is manufactured as a standard chassis in two lengths, to each of which may be fitted either a long or a short platform. There is an extensive line of optional bodies and the Packard Company is provided with designs for a great number of special bodies. In addition, any other type of special body will be designed and built to order. The normal capacity of the Packard truck is three tons and the maximum speed twelve miles an hour. The price of the standard chassis is \$3,400, and the price of the complete truck with standard body and equipment, is \$3,550.

The four-cylinder vehicle motor is under a bonnet on the front end of the chassis. It develops 24 brake horsepower at 655 revolutions. The Packard water-jacketed carburetor is unadorned and also the regular Packard ignition system, which is by jump spark, the current being supplied by an Elsmann magneto with storage battery for reserve and starting on the spark. Lubrication is by splash from the crank case, to which oil is fed by positive pumps from a warmed reservoir between the cylinders. There are eight feeds on the dash. The water-cooling system includes a cellular radiator and positive circulation by centrifugal pump. The speed of the motor is automatically controlled by a governor which acts directly upon the throttle and spark advance. There is a secondary throttle for the regulation of the speed within the limits of the automatic control. This is operated

by a hand lever on the steering wheel and by a pedal.

Transmission is through a Packard dry plate clutch, of the same principle as that used in the 1910 Packard motor car. A Packard type of sliding gear transmission is combined with the differential gear, making a countershaft unit within a rigid housing. It provides three forward speeds and one reverse. The final drive is by sprockets and side chains to the rear wheels. The main frame is of channel section rolled steel. It is carried on four semi-elliptical springs. Both front and rear axles are solid steel drop forgings of rectangular section. The steering yokes are integral with the front axle. The front wheels have single solid tires, 34 by 4 inches and the rear wheels have dual solid tires, 35 by 4 inches. There are four internal expanding metal-to-metal brakes, the foot brakes acting on the ends of the countershaft and the emergency brakes on rear wheel drums. Each truck is completely equipped with odometer, lamps, horn, tubes, etc.

LAHAINA LANDS

Governor Frear was engaged on Saturday morning with land matters, some of them relating to homestead openings. Action was taken with regard to some two dozen pieces of land scattered around Hilo whose occupants are without title. In some cases quitclaims will be given, certain lots will be sold at auction, proceedings will be taken to recover some and still other pieces will be exchanged.

Auditor Fisher yesterday handed over to City and County Treasurer Trent a sum of over \$45,000, being the balance due the city and county found at the half-yearly clean-up.

TAKE IT NOW.

It's not too late to prevent serious heart troubles if you will take Dr. Miles' Heart Cure at once, when you have dizzy spells, shortness of breath, fluttering of the heart, irregular pulse, weak or hungry spells. These are early, but urgent symptoms of heart weakness, and must be given immediate attention. Money back if first bottle fails to benefit.

Gibson, the noted twirler of the Marine baseball team, will probably pitch for the Japanese Athletic Club next season.

THE FILIPINOS

Commenting on the departure of another shipment of Filipino laborers to Hawaii, El Renacimiento says: under the cartoon of "The Exodus to Hawaii."

"We are informed that tomorrow there will sail for Hawaii 120 Filipinos under contract to work on the sugar plantations of that country.

"These 120 Filipinos will be one of the several bands of laborers who are periodically carried away from these shores by the agents of the said plantation companies.

"And like those who have gone before them, these Filipino laborers go in the belief that they will find better opportunities in life that they have vainly sought in their own native land.

"It is very difficult for one who recalls the great love of the Filipino for his native land, a love that at times amounts to a repugnance and horror at the idea of leaving the home and hearth however miserable it may be to understand the reason for this extraordinary exodus the importance of which appears to have escaped the attention of the ruling class of the Philippines.

"Do they live so miserably here and amid such desperation in their struggle for life in their own country, or are they blinded by the brilliancy of the promises made to them about the prospects awaiting them in another country where they will be better treated?

"Of a truth we find no other explanation outside these two extremes. It is somewhat difficult to explain to the lack of which many people charge the want of progress in the country and among the people."—Manila Callaness, Dec. 15.

A REMEDY FOR CROUP THAT IS ABSOLUTE SAFE.

Croup is the most prevalent during the dry cold weather of the early winter months. Parents of young children should be prepared for it. All that is needed is a bottle of Chamberlain's Cough Remedy. Many mothers are never without it in their homes. It is not only a safe and harmless medicine but the best in use for coughs, colds and croup. For sale by all dealers, Benson, Smith & Co., agents for Hawaii.
